

Introducing

# TotalRecycle

*Your one stop drop for recycling*

TotalRecycle, Inc., a J. P. Mascaro & Sons affiliated company, will soon be opening its new, fully automated, 75,000 square foot single stream recycling facility at 1270 Lincoln Road in Exeter Township, Berks County, Pennsylvania, adjacent to Mascaro's Pioneer Crossing Landfill.

Situated on a 14-acre site, the TotalRecycle facility is the first of its kind in Berks County; it has the latest in automated single stream recycling technology; and at full capacity it can process over 500 tons of single stream recyclables daily.

Newspaper

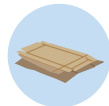

Plastics #1-#7

Aluminum

Glass

Cardboard

TotalRecycle will accept and process from municipalities, waste haulers and businesses a wide variety of recyclables, including plastic #'s 1-7, cardboard (OCC), aluminum, newspaper (ONP), clear and colored glass, steel, tin, e-waste, and aseptics.

Single stream recycling at TotalRecycle means that all recyclables can be commingled in one container, without separation by the homeowners, haulers or businesses. All separation will occur at the TotalRecycle facility.

TotalRecycle will open for operation in January 2016, and it will play a major role in successful and increased recycling efforts of Berks County and surrounding counties. Those interested in learning more about the TotalRecycle facility, its services, and how your business can benefit from it, please contact us at 267-933-6128 or online at [www.jp Mascaro.com](http://www.jp Mascaro.com).
